

# Woon Eusean

Polyglot full-stack developer that loves to dabble in new technologies across the board, from web to desktop to mobile. Working professionally for a little over a year but have been constantly learning for more than a decade. If I'm not working on a personal project with bleeding edge technologies, you'll find me at the driving range trying to fix my driver slice.

## Professional Experience

**Snappymob Sdn Bhd** | Fullstack Software Engineer | September 2023 – Present

- **Mentored colleagues** across projects, providing high- and low-level consulting to **ensure solutions aligned** with their project needs.
- Consistently **delivered multiple phases** of a project **on time** by working in an **AGILE team**.
- Facilitated **clear communication with clients**, adeptly **addressing uncertainties** to deliver exceptional project outcomes.
- Designed **compelling UIs** with **NextJs/React & Blazor WASM**, maintaining fidelity to Figma standards for enhanced user engagement.
- Engineered **scalable APIs** using **NestJs & ASP.NET Core**, effectively managing traffic volumes of up to **50k monthly active users** without compromising performance.
- Managed deployment and optimization of **Alibaba Cloud, Azure and AWS services**, databases, and infrastructure to ensure robust performance and reliability.

**Touch 'n Go Sdn Bhd** | Application Development Intern | July 2022 – November 2022

- Collaborated in an **AGILE team** to develop front-end and back-end applications using Java 8.
- Utilized industry-leading technologies like **Spring Framework, Spring Boot, CUBA Platform, and Java Persistence API** with Hibernate for efficient application development.
- Implemented **Apache Kafka** for real-time microservice development, ensuring seamless communication and data integration.
- Demonstrated proficiency in **MySQL** for designing and optimizing database schemas and queries.
- Employed **Jenkins** for continuous integration and deployment, ensuring high-quality software delivery.

## Educational Background

<b>Bachelor's Degree in Computer Science</b>	Asia Pacific University	Sept 2023	3.70/4.00 CGPA
<b>Diploma in Software Engineering</b>	Asia Pacific University	April 2021	3.90/4.00 CGPA

## Achievements

[Champion of JomHack ImpactHack 2023](#)

Create an all-in-one tool for SMEs to **integrate multiple channels of data** for better data management and knowledge.

[Champion of UM Hackathon 2023](#)

Create a solution to **assist venture capitalists** with automated due diligence using **AI recommendations** and **sentiment analysis**

## Activities

[OSS Contribution – faker-js/faker](#)

12.5k Stars on GitHub

Contributed a **new function** into the project which generates strings from regular expressions (RegEx).

[OSS Contribution – drakkan/sftpgp](#)

9.2k Stars on GitHub

Created a **proof-of-concept** file drag-and-drop feature with Dropzone.js v6 to **assist the maintainer** of the project on deciding a suitable drag-and-drop library.

## Technical Skills

- Frontend (React.js, Next.js, Angular, Blazor)
- Backend (Express.js, Nest.js, ASP.NET Core, Spring Boot)
- Databases (MySQL, PostgreSQL, SQL Server/MSSQL)
- DevOps (Azure, Alibaba Cloud, AWS)

## Personal Projects

Check out my GitHub for project details

- [Portfolio](#) – My portfolio made with three.js
- [TextORM](#) – ORM library with text file as storage.
- [java-automapper](#) – Utility to map objects to others.
- [gamesense\\_portfolio](#) – Game-inspired web portfolio.
